### **Introducing Fiberon Sensibuilt™ PVC Decking** *Raising the Bar with Category-Exclusive Ten Year Fade Warranty*

New London, NC – Fiber Composites, a leading manufacturer of alternative decking, railing and fencing solutions, introduces Fiberon Sensibuilt™ decking with an innovative patent pending technology unequaled by other decking against fading. Fiber Composites leads the industry in color retention with Lumenite™, a fusion-bonded surface technology that offers ultimate stain, scratch, fade and mold resistance. Fiber Composites backs this patent-pending technology with the industry's first 10-Year Fade Resistant Warranty.

The Sensibuilt Lumenite surface decking product is the first product to offer homeowners high performance decking and ultra low maintenance. In addition to exceptional stain, scratch, fade and mold resistance, Fiberon Sensibuilt is moisture, impact and slip resistant, and it won't chalk, split or rot. The Sensibuilt infrared, heat reflective surface is impermeable and cooler underfoot. Available in four bold, architectural colors (mocha, driftwood, redwood and cedar); Sensibuilt never requires painting, staining or power washing.

Also backed by a Limited Lifetime Warranty, Fiberon Sensibuilt Decking resists splinters, termites, mold, and decay and includes a Class A Fire Rating for Flame Spread. Fiberon Sensibuilt Decking is 100% recyclable and consists of recycled PVC to provide homeowners a sustainable choice in decking.

Contractors that install Fiberon Sensibuilt decking boards will benefit from the patent pending Deck Pilot™ hidden fastening system, the strongest and most cost effective without the need for extra hardware. Fiberon Sensibuilt is lightweight and easy to install, exceeding code requirements in hurricane prone areas.

The Fiberon product family is sold to professional contractors through a national network of distributors. To learn more, visit [www.fiberondecking.com](http://www.fiberondecking.com), call 1-800-573-8841, or send e-mail to [info@fibercomposites.com](mailto:info@fibercomposites.com).

*Fiber Composites, LLC is a leading manufacturer of composite decking, railing and fencing used in homes and light commercial construction across North America. Its Fiberon brand product line is designed specifically for professional contractors. Fiber Composites' polymer chemists and extrusion professionals employ the latest technology to constantly innovate, using the finest raw materials coupled with leading manufacturing processes to ensure best-in-class quality. Fiber Composites was founded in 1997 and is a privately owned company with operations in North Carolina and Idaho.*
