### ***Titan Power Drivers Available For Sale Through Deerbusters.com***

Waynesboro, PA: Deerbusters.com is pleased to carry gas-powered post drivers from Titan that will help expedite small- and large-scale landscaping projects for commercial fence installers and independent contractors.

To speed up installing fence posts on landscapes, installers can use post drivers to help easily drive posts, stakes and rods into smooth soils.

American-made and serviced Titan post drivers are lightweight at just 28-35 pounds and powered using a 1.3 horse powered 4-stroke Honda engine. They work using a simple recoil pull start with a trigger throttle and integrated stop button. The fence post drivers contain internal dampening springs to lessen vibrations to the operator and high-quality sealed bearings and Viton O-rings for long tool life. They are easy to lift, move, and carry down the fence line. Best yet, there are no hoses or compressors to drag through landscapes. While gas-powered post drivers are used to install posts, they do not work to install ground sleeves.

Deerbusters.com offers economical to professional grade Titan post drivers for sale to appeal to different budgets.

#### **About Deerbusters.com:**

DeerBusters has been leading the fencing industry for over 30 years with reliable DIY garden fence in plastic and metal fence materials for homes, farms (including hemp farms), forests, colleges, orchards, vineyards, and gardens.
