Deerbusters Expands Fencing Options

With Multi-Purpose Fencing With Reinforced Bottom.

Waynesboro, Pennsylvania: Deerbusters.com is pleased to announce the expansion of the Trident HD Plastic Deer Fence collection with all new multi-purpose fencing.

Multi-Purpose fencing can be used for a variety of applications including: perimeter fencing for small garden plots less than 100 linear feet; pond protection by keeping out leaves and debris; and to fill in gaps in existing fences and balconies.

Trident's multi-purpose deer fence is made from a durable polypropylene material with 1" x 1" mesh holes to protect landscapes against small critters. Furthermore, the fencing contains a reinforced bottom to block deer browsing attempts and to easily hold down fence stakes. In addition to being UV-stabilized, this heavy-duty plastic fence contains a 650-pound breaking strength and a lifespan of up to 15 years in all weather environments.

Trident's multi-purpose fencing comes in 6' x 100" roll sizes in either black or grey fence mesh colors on www.Deerbusters.com.

About Deerbusters Deer Fence:

DeerBusters has been leading the fencing industry for over 30 years with reliable DIY garden fence in poly and metal fence materials for homes, farms, forests, colleges, orchards, vineyards, and gardens. We are proud to work with wildlife conservation agencies and landscape architects as well as deer farmers.
