TimberTech Reaches New International Heights

Overseas Growth Fuels Enhanced Web Presence

Wilmington, OH – March 18, 2010 – TimberTech[®], manufacturer of low-maintenance decking, railing and fencing products, has been growing its presence internationally for the past eight years and has become one of the most recognized manufacturers worldwide. Most overseas manufacturers offer very narrow product lines. What separates TimberTech is the performance of its decking and railing solutions as well as their extensive array of innovative products that offer many solutions depending on the users' needs.

"The growing trend towards residential outdoor living and continued development of commercial projects connected with the tourism industry has fueled this growth due to the demand for low-maintenance products," said Christian Stock, International Sales Manager, TimberTech. "They are ideally suited for destinations that receive a great deal of traffic while significantly reducing the amount of maintenance time necessary for proper upkeep."

Taking a cue from the high demand in the U.S. market, the international market has been quickly integrating these products into more residential, commercial and public projects. TimberTech products have been used in some of the most prestigious locations spanning the globe including:

- Dubai Creek Golf & Yacht Club, United Arab Emirates
- Royal Naval Dockyard, Bermuda
- One° 15 Marina, Singapore
- Lake Müritz, Germany
- Poruklu Bay, Turkey
- Puteri Harbour, South East Asia
- La Barceloneta, Spain

TimberTech maintains a presence in:

- Europe
- Middle East
- Latin America
- Central America
- Caribbean
- Southeast Asia

To fully support these markets, TimberTech has launched new robust web sites that showcase their entire line of products through extensive photo galleries, installation guides, technical guides and client testimonials. A listing of these international sites can be found [here](#).
